The program committee invites speakers, participants, and exhibitors to an eventful couple of days on advances in clean rooms and clean technologies.

The program will focus on how to:

- Perform risk assessment (resource efficiency, cover the necessary topics, ...)
- Do proper design (requirements, planning, materials, clean rooms ...)
- Chose effective sanitation & verification regimes
- Implement new technologies and innovations

We would very much like to promote networking therefore we have included the banquet in the conference fee for participants and exhibitors.
